

## Useful Connexion Macros

- **Browse authority file:** In a bibliographic or authority record, select some text within a heading field (1xx, 6xx, 7xx, 8xx) or simply click anywhere in a variable field, and run the macro. The macro will browse the authority file using the words in the selection, or using the whole field, if no text is selected.

- **Get authority heading and paste into bib record:** Makes a good pairing with the Browse Authority file macro described above. Make sure you have the bib record opened in one window, and the authority record in another.  
<http://docushare.lib.rochester.edu/docushare/dsweb/Get/Document-20013/GetAuthHeading.txt>
- **Create cutter based on 100, 110, or 245:** Highlight the letters you want to use before running the macro.  
<http://docushare.lib.rochester.edu/docushare/dsweb/Get/Document-20014/CutterCreate.txt>
- **Create 246 from 245:** Highlight the text you want to use before running.  
<http://docushare.lib.rochester.edu/docushare/dsweb/Get/Document-20017/Make246.txt>
- **Change 508 and 511 names to 700 fields:** scroll down page until you find “508-511to700”; then click text link  
<http://users.rcn.com/aardy/oml/connex.html>
- **Copy a field and paste it in a new field directly below the original:** Changes some tags (e.g., 100 field changes to 600 or 700, 600 changes to 700 or vice versa)
